

AMONG THE ADVANTAGES OF A TRUST COMPANY
—ARE—
CONTINUOUS EXISTENCE,
INVESTMENT EXPERIENCE
STATE SUPERVISION

In addition, the highly specialized service of a Trust Company costs no more than that of an individual.

For these reasons, among others, it is more and more becoming the practice among leaders of industry and finance to name a trust company as executor and trustee.

It is well worth your while to watch the news reports of the disposal of large estates and to consider whether it would not be to your advantage to obtain the benefit of our service for your family, whether your estate be large or small.

The officers of this company will be glad to consult with you on any Trust matter you may have in mind.

THE "GIFT"
OF GIVING

The selection of suitable Christmas presents is by no means an easy task.

The first few names on the list are easily "checked," but then the problem: "What shall I give Louise? She has just everything," is the common plaint.

A Gift From Campbell's solves the problem. And nothing could be more appreciative. There are many things to select from.

ST. LOUIS MARKETS

St. Louis, Dec. 12.—Receipts—Cattle, 13,000 head; hogs 27,000; sheep, 2,000; horses and mules 1,200.

Cattle—Offerings were fair and quality better than of late. Several droves of good finished heaves arrived for the Christmas trade, establishing record prices for the market. Macoupin county, Ill., yearlings averaging 1000 pounds at \$10.50 per hundred. Pettis county, Mo., steers averaging 1550 pounds sold at \$19. Maize county, Mo., heaves brought \$17.75, weighing 1200 pounds. The choice steers sold steady, but trade was slow on the \$15-\$16 kinds and sales were reported weak to lie to the lower. Steers from \$11 to \$12.50 met with good competition from feeder buyers.

Hogs—Offerings again large with total of 27,000 head. The trade was much the same as the close of last week, the top price was \$17.75 and the bulk sold at \$17.25-\$17.55. Good quality hogs of medium heavy weight were ready sale, but the poorer grades and the pigs and lights moved rather slow and several thousand head were unsold at the close, some of which did not receive a bid.

A big lot of quality hogs arrived on the market, but at the same time the house was full of pigs and lights that were not very desirable. Good hogs found sale at \$17.25 and upward, fair to good hogs \$17.25 to \$17.50; lots of good hogs selling for \$17.40 to \$17.50 that were good enough for any purpose.

Sheep—A moderate supply of lambs, but there was not many shown on the market. Values were on about the same basis as the close of last week, but lambs showed a loss close to 7c from the best time the form part of last week. Sheep are selling about as good as any time last week and there is a good demand for them.

Most of the hams were of good quality and sold at \$15, which is the top for the market in Chicago, and the same as the top in Chicago. Some other hams sold at \$14.50-\$15.00, with the culls going at \$11.00-\$12.00, that were not fit to do out of readily.

Cash wheat—Received 132,000 bu., including 79 cars local and 21 from offerings about 50 cars, of which 17 cars sold to local mills, 20 to elevators and 10 to go out. Premiums unchanged and demand fair. No. 1 red selling from 2 1/2 to 2c over government price and No. 2 red, 10c to 11c over. All good hard wheat found buyers, principally shipping, but southerly hard wheat and northern spring wheat slow, and several cars carried over.

Track sales—(Schedule, if any, at foot):
No. 1—Red Winter—2 cars, 61 1/2 lb. test at \$2.35; 6 cars 60.60 lb. test at \$2.35; 3 cars 60 lb. test at \$2.35; 1 car quality at \$2.34.
No. 2—Red Winter—3 cars 58 1/2 lb. test at \$2.31; 4 cars 59 lb. test at \$2.31; 1 car quality at \$2.34.
Corn—Professional operations active altho the trading was general unsettled and shaky at times. Prices fluctuated sharply, ranging early 5.80c higher to 5.60c lower than Saturday, the top figures being made after the noon hour. Futures closed weak and heavy 7 1/2 to 1 1/2 off for the day.
January opened at \$1.38 1/2, and later to \$1.39 3/8 to \$1.38 to \$1.37 1/2, up irregularly to \$1.39 1/2 to \$1.38 1/2 to \$1.38 to \$1.39 5/8 to \$1.39 1/2, down under excessive offerings to \$1.38 1/2 to \$1.38 to \$1.37 1/2, then to \$1.37 1/2 to \$1.37 1/2 to \$1.37 1/2 at the close.
February sold at \$1.37 1/2 (opening) to \$1.38 1/2 to \$1.39 to \$1.38 1/2 to \$1.37 1/2.

FARMERS ADVISED TO PRODUCE MEAT

Washington, Dec. 12.—In support of its policy to keep farmers of the United States fully informed of world food conditions and probable needs for certain commodities, the United States Food Administration has completed a summary of unusual importance to producers.

The world balance sheet of food products show a shortage of 3,000,000,000 pounds of fats and 3,000,000,000 tons of high protein feeds. Among fats are included proteins products and vegetable oils.
Commodities of which there are sufficient supplies if used with economy are wheat, rice, beans, peas, and other foods other than high in protein. Sufficient beef is in sight to load all refrigerating ships' capacity.
There is enough sugar for our normal consumption if other nations retain their present rations. If they increase their rations there will be a shortage. Coffee is the only common food commodity of which there is a world surplus.
With the possible exception of high protein feeds, the United States has sufficient food and feed for its own people, but to fulfill its pledge of 2,000,000 tons to Europe by July 1, 1915, there must be a continued conservation and avoidance of waste.
The world shortage of fats is explained by Hoover as due "primarily to the fact that Europe has been expending its dairy herd, and the fact that there has been a great denigration in its products of vegetable oils in certain regions owing to the inability to secure shipping."
According to food administration calculations, even with all of our supplies and best efforts, the world will be far deficient in its normal amount of fats for two or three years at least. The future of the American producer who is equipped for general farming seems to be in a floundering state of uncertainty, and home grown foods with which to grow live stock economically.

Atlantic City, N. J., Dec. 12.—Judicial control of railroads with judicial intervention was advocated in the report of the Railway Scientific Commission of the National Investment Bankers' Association. The program plan of railroad regulation, the report declared, was a failure and the roads should not be returned to their present status without providing relief from the burdensome conditions under which they have heretofore operated.

Any plan of future government control should eliminate the conflict of control between state and federal bodies.
"The Sherman anti-trust law and state anti-trust laws in their application to transportation should be repealed in the interests of efficiency and economy, because such laws are unnecessary under proper government regulation.

Trustee Sale
Whereas John H. McClure, single and unmarried, of St. Louis, Missouri, by his certain Deed of Trust, dated the 25th day of January, 1916 and recorded in the Recorder's office in the county of Cape Girardeau, State of Missouri, in Book 12, page 135, of the land records of said county, conveyed to HARRY E. ALEXANDER, Trustee for J. W. Phillips, the following described real estate situated in the city and county of Cape Girardeau, State of Missouri, to-wit: ...
"The west Sixty (60) feet of lot Twenty (20), Range "A", City of Cape Girardeau, fronting Sixty (60) feet on William Street by One Hundred Seventeen and Fourteen One-Hundredths (117.14) feet on Lorimer street one hundred and seventeen and fourteen one-hundredths (117.14) feet to the dividing line between lots No. Twenty (20) and No. Seven (7); thence West on said dividing line Sixty (60) feet to the East line of Lorimer street, thence South along the East line of Lorimer street One Hundred Seventeen and Fourteen One-Hundredths (117.14) feet to the place of beginning.

Subject to an incumbrance of Nine Thousand (9,000) Dollars payable to the Cape Girardeau Building and Loan Association of Cape Girardeau, Missouri.
In trust to secure the payment of a certain promissory note, together with interest thereon, described in said Deed of Trust and,
Whereas it is stipulated in said Deed of Trust that if the interest on said note shall become due and payable and shall remain unpaid, then the whole of said note shall, at the option of the holder thereof become due and payable at once, and
Whereas default has been made in the payment of the interest due on said note, and the same is now past due and unpaid.
Now, therefore, at the request of the legal holder of said note, and in pursuance of the conditions in said Deed of Trust, I, the undersigned Trustee, will sell the property above described at public vendue to the highest bidder, for cash, at the front door of the court house in the city of

The Electrical Voice

It is a very delicate electrical current that carries the sound waves produced by the human voice over the telephone wires.

It reproduces these sound waves in their minutest detail and travels with almost the speed of light.

Sound waves travel through the air at the rate of 1,160 feet a second. Carried through the air at that rate it would take four hours for the human voice to cross the continent.

It takes one-fiftieth of a second for the voice to travel from New York to San Francisco, 3,400 miles over the transcontinental line of the Bell system, so that it may be said that telephonic communication from coast to coast is practically instantaneous.

Every Bell Telephone is a Long Distance Station.
Cape Girardeau Bell Telephone Co.
